

p16 MMAB & RMAB IHC ANTIBODIES

Higher Sensitivity

Higher Specificity

More Economical than Other Suppliers!
Works with All Automated Platforms!
IVD Validated for Immunohistochemistry!

Lower Cost

The Staple for IHC Cervical Cancer Diagnosis

Bio SB is now offering the popular p16 IHC antibody, IVD validated, in both Rabbit Monoclonal (RBT-p16) and Mouse Monoclonal (16P04, JC2) presentations. p16 is a tumor suppressor gene, important in regulating the cell cycle by binding and deactivating various cyclin-CDK complexes. The Bio SB p16, MMab and RMAb have been validated to work with Ventana and Leica automated platforms, and are available in concentrate and convenient tinto predilute formats to meet your laboratory needs.

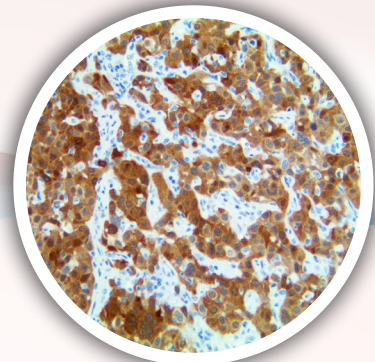

Overview

- Cost effective compared to Ventana, Leica and Cell Marque.
- IVD Validated for IHC.
- Ready to Use and concentrate presentations available.
- Works with Ventana and Leica automated platforms!

p16 (16P04, JC2), MMab = \$5.20 per test *

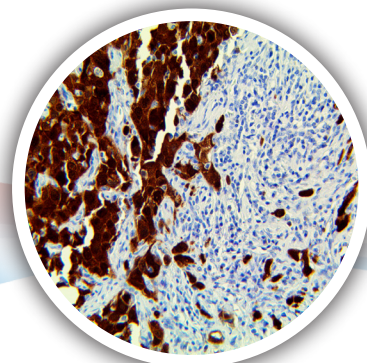

p16 (RBT-p16), RMAb = \$6.50 per test *

Catalog #	Product Description	Price
BSB 3476	Tinto p16, RMAb, 3 ml Predilute	\$283.00
BSB 3477	Tinto p16, RMAb, 7 ml Predilute	\$516.00
BSB 3478	Tinto p16, RMAb, 15 ml Predilute	\$961.00 *
BSB 3479	p16, RMAb, 0.1 ml Concentrate	\$293.00
BSB 3480	p16, RMAb, 0.5 ml Concentrate	\$789.00
BSB 3481	p16, RMAb, 1 ml Concentrate	\$1,191.00
BSB 3684	p16, RMAb, Control Slides (5 each)	\$60.00

**IHC of Bio SB's p16 MMab
on a FFPE Lung Squamous
Cell Carcinoma Tissue**
