

PRAME FOR IHC

New IHC Marker for Melanoma Diagnosis

PRAME (Preferentially Expressed Antigen in Melanoma)

FREE 3ml RTU sample with promo code

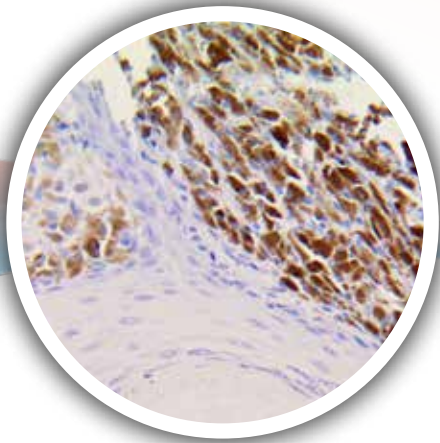

BSB-PRAME-samples

Bio SB is now offering a PRAME antibody for melanoma diagnosis, IVD validated for Immunohistochemistry. The PRAME gene encodes an antigen that is predominantly expressed in human melanomas and that is recognized by cytolytic T lymphocytes. This makes PRAME expression useful for diagnostic purposes to support a suspected diagnosis of melanoma. The Bio SB PRAME RMAb has been validated to work with Ventana and Leica automated platforms, and are available in concentrate and convenient tinto predilute formats to meet your laboratory needs.

Overview

- Immunoreactivity found in 87% of Metastatic Melanomas and 83.2% of Primary Melanomas.
- Useful in diagnosing most melanoma subtypes.
- IVD Validated for IHC.
- Ready to Use and concentrate presentations available.
- Works with Ventana and Leica automated platforms!

Affordable, Reliable IHC Diagnosis for Melanoma

IHC of Bio SB's PRAME RMAb on a FFPE Melanoma Tissue

Catalog #	Product Description	Price
BSB-2374-3	Tinto PRAME, RMAb, 3 ml Predilute	\$294.00
BSB-2374-7	Tinto PRAME, RMAb, 7 ml Predilute	\$536.00
BSB-2374-15	Tinto PRAME, RMAb, 15 ml Predilute	\$962.00 *
BSB-2374-01	PRAME, RMAb, 0.1 ml Concentrate	\$323.00
BSB-2374-05	PRAME, RMAb, 0.5 ml Concentrate	\$870.00
BSB-2374-1	PRAME, RMAb, 1 ml Concentrate	\$1,313.00
BSB-2374-CS	PRAME, RMAb, Control Slides (5 each)	\$63.00
